

Tornado Safety Tips:

- ❖ Seek shelter in an interior room on the lowest floor of your home, such as a bathroom, closet or room without windows. Cover yourself with a mattress or cushions.
- ❖ In an office building, go to an interior room or hallway on the lowest floor.
- ❖ If you are in a mobile home, get out and take shelter in a nearby building. If there are none, lie flat in a ditch or ravine.
- ❖ **Never** stay inside a car. Get out and lie flat in a ditch or a ravine. If a building is nearby, take shelter inside. Do not try to outrun a tornado in your car.
- ❖ At school, follow plans and go to a designated shelter area, usually interior hallways on the lowest floor. Avoid auditoriums, gyms and areas with wide, free-span roofs.
- ❖ In a shopping center, move towards the interior away from exterior glass walls.
- ❖ If you are in open country, take cover in a low spot away from trees.
- ❖ Learn the difference between a **Tornado Watch** and a **Tornado Warning**. A Tornado Watch means watch the sky. A Tornado Warning means a tornado is on the ground and you must **seek shelter immediately**.
